

ABOUT ALLONIA

Created in 2021, Allonia (ex. Aleia) offers companies and public organisations THE 100% sovereign, secure and collaborative AI SaaS Platform.

Our all-in-one 360° platform enables technical and business teams to collaborate very easily on all AI projects (classical AI and/or generative AI).

Our platform provides the most innovative tools and integrates all kinds of data, a wide selection of models and libraries, all on a high-performance, sovereign infrastructure.

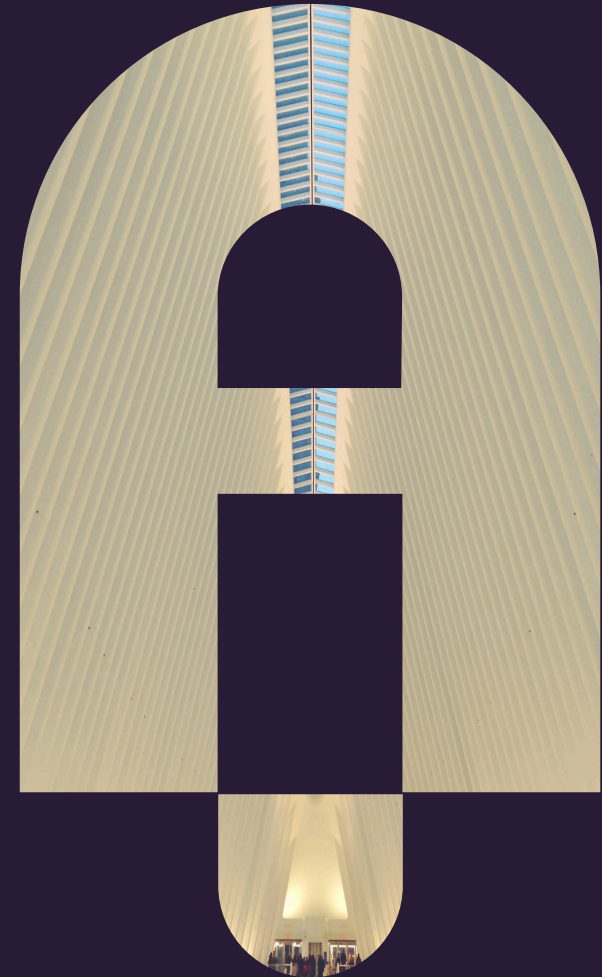

- Import your data and code directly into the integrated, collaborative notebook.
- Manage your teams and use the model(s) of your choice.
- Monitor and fine-tune models for optimum performance.
- Speed up production by interfacing with your business applications.

More than twenty customers in various sectors (energy, logistics, mobility, cyber, etc.) have placed their trust in us !

Allonia now has 40 employees and is rapidly expanding !
Discover our 3 offers in this brochure : ALLONIA PLATEFORME, END POINT and CHAT.

ALLONIA - AI FOR YOUR BUSINESS

It's not always easy to find your way around the world of AI. That's why ALLONIA provides simple, secure, turnkey tools.

Our 100% sovereign, secure and collaborative AI SaaS platform has been designed to meet the business challenges of companies and public organisations. Our all-in-one 360° platform enables technical and business teams to collaborate very easily on ALL AI projects (classical AI and/or generative AI). Discover our 3 offerings :

ALLONIA PLATFORM

Industrialise ALL your AI projects : go from POC or MVP to production in just 1 click !

- Easily import your data using a range of connectors
- Manage your teams as you see fit, directly from the platform
- Code in an integrated notebook (Jupyter Notebook)
- Select or import the library(ies) of your choice
- Create your own template or use one of the available templates
- Train your models and compare their performance or different versions
- Manage your pipelines in real time
- Monitor and fine-tune models for optimum performance
- Scale up jobs or services in just a few clicks
- Interface with your business applications using APIs

The Allonia platform has been designed to provide controlled and traceable federated learning capabilities either between several projects within the same organisation or between several companies in order to collaborate on building models without necessarily sharing the underlying data.

Business Apps
energy, renovation, mobility, cybersecurity, health, transport, logistics...

Engineering tools

Models (Python library) - LLMs

Infrastructure

The ALLONIA platform is :

- A 360° all-in-one platform : “classic” or “generative” AI : sovereign, collaborative and secure !
- A high-performance, secure and sovereign infrastructure with clouds such as Outscale, Scaleway, Numspot, OVH Cloud, etc.
- Access many models and LLMs

Benefits :

- Saves time in deploying any AI project(s).
- Compliance
- Data security
- An ALL-in-one, 360°, sovereign platform
- Access to all the models and libraries of your choice
- Simple team management
- Real-time monitoring of consumption (CPU/GPU)

Price : based on number of users and infrastructure

ALLONIA CHAT SECURE

Secure, high-performance access to your company chat! For your employees or for your customers/prospects. Like CHATGPT or GEMINI, but directly connected to your internal documents.

Key benefits :

- Turnkey tool
- Use of the best LLMs (Mistral, Llama, Gemma...)
- No data output
- Secure, sovereign hosting: SecNumCloud & HDS
- Adapts to all document collections

Price : 2 week free trial! Then, from €30/month (per user).

ALLONIA END POINT

If you already have your own engineering tools, opt for the ‘end point’ package, which allows you to use only the integrated models and to create multi-models without using the entire platform.

A package designed for software developers !

Benefits :

- Use only what you need
- Simplified access to and use of LLMs
- Integrate generative AI in 1 click

Price : per token and API call
